

TRU HOSPICE NEURODEGENERATIVE DISEASE PROGRAM

TRU Community Care offers expertise in the management of progressive neurodegenerative symptoms for your patients with terminal diseases including ALS, Parkinsons, Multiple Sclerosis, Lewy-body disease, multiple system atrophy, and stroke.

When your patients with these diseases are nearing their final days, we can provide compassionate care and expert symptom management in the familiar comfort of home, surrounded by loved ones. Our family centered approach means we'll also guide and assist caregivers during this profound time, along with offering them grief support after the loss.

With TRU, your patients receive:

- Expert pain and symptom management in the comfort of home
- Unparalleled clinical, emotional, and spiritual support so that every day can be lived to the fullest
- 24/7 availability of a TRU Hospice nurse who has ready access to all records
- Continuous in-home care during crisis situations
- Around-the-clock care at the TRU Hospice Care Center in-patient facility when pain and symptoms cannot be managed at home

What makes TRU the right choice?

- Everyone who cares for your patient is expert in managing progressive neurodegenerative symptoms.
- We offer superior expertise in medication management, care for bed-bound patients and those on bi-pap or in need of wound care.
- Specialized equipment and protocols are designed for end-stage neurodegenerative disease patients.

Referrals are easy. We admit patients around-the-clock, just by calling 303.449.7740. We're always happy to collaborate with you, to whatever degree you desire, around your patient's care. You can trust TRU to nurture your patients because, like you, we keep their welfare top of mind.
